Applicant: Robert G. Tryon III

Serial No.: 10/002,316 Filed: October 25, 2001

Page : 8 of 9

REMARKS

Applicants have considered the Notice of Allowance, and accompanying Examiner's Amendment and Statement of Reasons for Allowance, mailed September 23, 2005 in connection with the above-identified patent application and respectfully request entry of the instant Amendment and remarks to the file history thereof.

Applicants respectfully request that the Office notes the new attorney docket no. (17282-007001) for the subject application and updates their records with the same.

Amendments to the Claims

Applicants respectfully point out that none of the Examiner's amendments, as entered September 23, 2005, is disturbed by Applicants' amendments presented herein, except where errors of a typographical nature are involved.

In particular, Applicants amend claim 11 to correct a typographical error, and claim 53 to correct a grammatical error.

Applicants respectfully submit that the amendments herein do not introduce new matter into the subject application and do not raise new issues for examination. Accordingly, a reopening of prosecution is not warranted on the basis of these amendments. Furthermore, Applicants respectfully submit that the need for the subject amendments was only appreciated upon review of the complete set of allowed claims after receipt of the Notice of Allowance and Accompanying Examiner's Amendment. Therefore, Applicants respectfully request that the instant amendments be entered into the file history of the subject application.

Applicant respectfully submits that, notwithstanding the Examiner's assessment of the differences between Applicant's claimed invention and the cited references, the lack of a teaching of "including a microstructure-based failure model in the RVE" is not the sole difference between Applicant's invention and the prior art of record. In particular, the Examiner is referred to remarks presented in Applicant's amendment and reply, dated July 11, 2005, in which it was stated (at page 14) that the combination of the references does not teach an RVE microstructure-based failure model.

Applicant: Robert G. Tryon III Attorney's Docket No. 17282-007001

Serial No.: 10/002,316 Filed: October 25, 2001

CONCLUSION

In view of the above remarks, Applicants respectfully submit that the subject application is in good and proper order to proceed to issue. If, in the opinion of the Examiner, a telephone conference would resolve any outstanding matters not heretofore resolved, the Examiner is encouraged to call the undersigned at (650) 839-5070.

No fee is believed owed in connection with filing of this amendment under Rule 312, other than the issue fee claim authorized on the accompanying transmittals. Nevertheless, should the Commissioner determine otherwise, he is authorized to charge any underpayment or credit any overpayment to Fish & Richardson P.C. Deposit Account No. 06-1050 (order no. 17282-007001) for the appropriate amount. A copy of this sheet is attached.

Respectfully submitted,

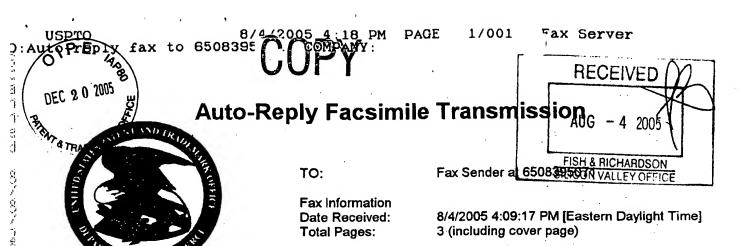

Date: December 20,2005
